

Specialty spotlight – cardiac services

ST JOHN OF GOD
Subiaco Hospital

A look at the services offered at St John of God Subiaco Hospital

Dear Doctor

St John of God (SJG) Subiaco Hospital is regarded as a centre of excellence in the treatment of adult and paediatric cardiovascular disease.

For more than 30 years, SJG Subiaco Hospital has worked in association with no gap provider, Western Cardiology, to deliver a complete range of cardiac services including:

- Interventional cardiology
- Cardiothoracic surgery
- Coronary care
- Electrophysiology studies and arrhythmia management
- Implantation of cardiac devices
- Cardiac rehabilitation

Our cardiologists and cardiothoracic surgeons collaborate with each other and with the hospital's multidisciplinary cardiac team, comprising pathologists, radiologists, nurses and allied health professionals, to ensure your patients receive a timely diagnosis as well as ongoing treatment and support.

We know that this collaboration results in the best possible patient outcomes.

Innovative services and facilities

SJG Subiaco Hospital continually invests in the latest innovations to ensure patients are provided the highest standard of care.

Procedures such as angiography and pacemaker surgery are performed in our state-of-the-art cardiovascular procedural laboratories, and our operating theatres are also equipped with latest technologies.

In addition, SJG Subiaco Hospital is a leader in minimally invasive cardiac and thoracic surgery. We have undertaken over 200 Transcatheter Aortic Valve Implantation procedures, as an alternative to open heart surgery.

Acute chest pain centre

The hospital's onsite chest pain centre offers 24/7 emergency cardiac care to privately insured patients who are experiencing chest pain or other acute cardiac symptoms.

The service is managed by Western Cardiology and includes an acute admission and assessment area.

To admit a patient directly to the centre, please call **0411 707 017**.

Coming soon

We are currently awaiting planning approval for our hospital's major redevelopment. The project includes the construction of a dedicated Heart Centre and private Emergency Department. This will provide your patients easier access to acute care delivered by our multidisciplinary cardiac team.

Referrals

For information about referring a patient to one of our leading specialists, please call Western Cardiology on **9346 9300**.

We look forward to caring for your patients.

Kind regards

Dr Paul Stobie
